

****Report No.:** RT-2026-Q1-ANALYSIS
****Report Date:** May 13, 2026
****Prepared by:** Strategic Development Department & Customer Research Center

I. Executive Summary

In the first quarter of 2026, Ruitai Life Insurance maintained steady business growth, with new business premiums increasing by 12.3% year - on - year. More notably, the ****full value realization of insurance policies**** – the entire journey from policy application, underwriting, service touchpoints, to final claim settlement or maturity payment – has become a key focus. This report selects three typical customer cases, tracks the complete closed - loop of “application → coverage → claim/payout” , and quantifies the dual benefits of insurance business for the company (value ratio, persistency ratio, brand reputation) and for policyholders (risk compensation, financial planning, psychological security).

II. Business Overview (January – March 2026)

Indicator	Value	YoY Change
	:---	:---
Total New Business First - Year Premiums	RMB 4.26 billion	+12.3%
Renewal Premium Income	RMB 6.83 billion	+8.7%
Total Claims & Benefits Paid	RMB 1.28 billion	+15.2%
Policy Persistency Ratio (13 months)	91.5%	+2.1 ppts
Overall Surrender Rate	3.2%	-0.7 ppts
New Business Value Margin	27.4%	+3.2 ppts

- **Business Highlights:****
- The share of critical illness insurance, high - limit medical insurance (RMB 1 million+), and whole life insurance increased further. Long - term protection - oriented products accounted for 64% of new business.
 - Online application penetration exceeded 40% for the first time, and the automated underwriting pass rate rose to 86%.

III. Full - Link Analysis: From Application to Insurance Outcome

3.1 Application Stage: Reach & Conversion

- **Channel distribution:** Online advertising (30%), agent referral (50%), bancassurance (20%).
- **Underwriting efficiency:** Average underwriting time for standard risks was **4.2 hours** (from application submission to e - policy issuance).
- **Key conversion factors:** Transparency of policy terms, price competitiveness, agent professionalism score.

3.2 Holding Stage: Service & Retention

- Customers can access health management services (online consultation, medical check - up discounts) and policy status reminders via the mobile app each month.
- Customer service satisfaction in Q1 2026 reached **94.7%**, with claims service satisfaction at **89.2%**.

3.3 Protection Realization Stage: Claim / Payout Outcomes

- Average claim settlement time: **2.8 working days** (small claims settled within 1 day).
- Claim acceptance rate: **98.6%** (main reason for denial: non - disclosure of pre - existing conditions).
- Maturity payouts: Average annualized return on annuity products was **3.65%** (guaranteed portion + participating/universal settlement).

IV. Quantitative Analysis of Dual Benefits of Insurance

4.1 Benefits to the Company

- **Financial benefits:** Release of residual margin after claims; after - tax operating profit in Q1 2026 grew 18.5% year - on - year.
- **Customer lifetime value:** Among customers who had a claim, the rate of purchasing an additional policy in the following year reached **37%**, significantly higher than the 12% for customers without a claim.
- **Brand benefits:** Net Promoter Score (NPS) increased from 42 at end - 2025 to **51** in Q1 2026.

4.2 Benefits to Policyholders

- **Risk hedging benefit:** Every RMB 1 of premium on average leveraged **RMB 85** of coverage (including critical illness, medical, and death benefits).
- **Financial stability benefit:** After a claim or payout, 83% of customers reported that their household financial buffer period was extended by more than 6 months.
- **Psychological benefit:** In customer follow - ups, 91% said that “owning a policy has

significantly improved their sense of security in life” .

V. Typical Cases (Complete Record from Application to Final Insurance Outcome)

To objectively reflect how insurance delivers value for different customer segments, we selected three real (fabricated) cases from customers who applied in 2025 and tracked their full journey.

Case 1: Critical Illness Claim – Operations Director of an Internet Platform

- **Policyholder Name:** Chen Min
- **Contact:** 158-1234-5678 (masked, virtual number)
- **Industry/Occupation:** Internet industry / Operations Director at a leading platform, age 38
- **Product Purchased:** “Ruitai HealthGuard Lifetime” Critical Illness Insurance – sum assured RMB 800,000, with 附加住院医疗险 (hospitalization medical rider, sum assured RMB 2 million)
- **Application Date:** June 15, 2025
- **Annual Premium:** RMB 18,240 (30 - year payment term)

Insurance Process:

- June 2025: Self - service application via the company’ s official website. Medical report showed mild fatty liver; standard underwriting.
- December 2025: Persistent chest pain without obvious cause; hospitalized and diagnosed with “acute anterior myocardial infarction” ; underwent coronary stent implantation.
- January 5, 2026: Customer uploaded medical records, diagnosis certificate, and expense list via the app.
- January 8, 2026: Company completed claim review and confirmed it met the critical illness definition of “severe acute myocardial infarction” .
- January 10, 2026: Lump - sum critical illness benefit of **RMB 800,000** paid, plus reimbursement of hospitalization and surgery expenses of **RMB 173,000** (full reimbursement of out - of - pocket costs) under the medical rider.

Benefits to the Policyholder:

- Chen Min was unable to work at full capacity for six months after surgery. The RMB 800,000 payout covered mortgage payments, rehabilitation costs, and his daughter’ s international school tuition.
- He commented: “On the day of diagnosis, my biggest worry was not my health but the

family cash flow. The moment the claim payment arrived, I truly understood that insurance is a ‘second income pillar’ .”

****Benefits to the Company:****

- Although the claim amount was high, the remaining annual premiums continued to be paid (the critical illness benefit terminated the main policy, but the medical rider remained effective – the customer still benefited). Chen Min voluntarily shared his experience on social media (WeChat Moments), bringing ****3** referred customers^{**} to his agent, generating total new business premiums of RMB 62,000.
- The company published an anonymized version of the case in industry media, generating an estimated brand communication value of RMB 1.2 million.

Case 2: Accidental Death Benefit – Production Supervisor at a Private Manufacturing Enterprise

- ****Policyholder Name:**** Zhang Weidong
- ****Contact:**** 139-8765-4321 (virtual)
- ****Industry/Occupation:**** Manufacturing / Production supervisor at a private enterprise, age 45
- ****Products Purchased:**** “Ruitai SafeCare” Comprehensive Accident Insurance (sum assured RMB 1.2 million) + Term Life Insurance (sum assured RMB 1.0 million)
- ****Application Date:**** March 10, 2025
- ****Annual Premium:**** Accident insurance RMB 1,680 + Term life RMB 2,950 = ****RMB 4,630****

****Insurance Process:****

- March 2025: Applied through an old classmate (agent referral). Due to mild hypertension, term life insurance was accepted with a 15% premium loading.
- November 19, 2025: Zhang Weidong was involved in a traffic accident while commuting home; died after emergency treatment (third - party liability, other party fully at fault).
- December 2, 2025: The family (spouse Li Xiumei) reported the claim and provided the traffic accident determination letter, death certificate, and autopsy report.
- December 15, 2025: Company completed investigation (no grounds for denial) and paid ****Accidental Death Benefit RMB 1.2 million + Term Life Insurance Death Benefit RMB 1.0 million = RMB 2.2 million****.

****Benefits to the Policyholder (Beneficiary):****

- After receiving the RMB 2.2 million claim payment, Li Xiumei paid off the remaining mortgage on the family home (RMB 820,000) and placed the remaining funds into a trust for the future educational expenses of their two children (aged 13 and 7).
- She said: “Without this money, I would have had to sell the house and move back to our hometown. Now the children don’ t have to change schools, and our daily life has not

been disrupted.”

****Benefits to the Company:****

- Although the claim amount was large, the risk margin for term life and accident insurance remained ample. The portfolio still generated positive mortality/morbidity gains for the company in 2025 among similar products.
- The company invited the family to participate in a public welfare documentary titled “Guardian” , enhancing brand emotional resonance. In that month, inquiries for term life insurance increased by ****41%**** month - on - month.

Case 3: Annuity Maturity Payout – Middle School Teacher’ s Retirement Planning

- ****Policyholder Name:**** Zhao Lihua
- ****Contact:**** 189-1122-3344 (virtual)
- ****Industry/Occupation:**** Education / Senior teacher at a public middle school, age 55 (retires in 2026)
- ****Product Purchased:**** “ Ruitai FortuneLife ” Retirement Annuity Insurance (participating type)
- ****Application Date:**** January 1, 2016 (10 - year premium payment period)
- ****Total Premiums Paid:**** RMB 500,000 (RMB 50,000 per year)

****Insurance Process:****

- 2016 - 2025: Premiums paid on time each year without interruption. The company demonstrated mid - tier dividend illustrations each year (actual dividend achievement rate: 92% - 105%).
- March 1, 2026: Under the contract, starting at age 55, the annuity is payable annually.
- March 5, 2026: Zhao Lihua applied for her first annuity drawdown.
- March 8, 2026: Company completed calculation: ****Guaranteed annuity + accumulated reversionary bonuses converted to additional sum assured + terminal bonus**** – first - year payment ****RMB 42,600****, and guaranteed for 20 years (if she dies, the remaining guaranteed amount is paid in a lump sum to the beneficiary).

****Benefits to the Policyholder:****

- Zhao Lihua’ s monthly salary before retirement was RMB 8,500. After retirement, her state social pension will be approximately RMB 5,200 per month. With the commercial annuity, her fixed monthly cash flow increases to ****RMB 8,750**** (annuity converted to a monthly equivalent of RMB 3,550 on top of the state pension), largely maintaining her pre - retirement income level.
- She said: “My husband and I plan to use this money for a trip every year, and save the rest for our grandson’ s education fund. This is the best retirement gift I could give myself.”

****Benefits to the Company:****

- This policy remained in force for 10 years, contributing stable renewal premiums and long - duration funds (average duration 12 years), providing a stable source of funding for the company' s equity investments.
- After annuity payments began, the funds were channeled into the company' s “Ruitai Retirement Community” service, which further drove her to purchase a retirement community admission qualification (additional premium of RMB 300,000), achieving cross - selling.

VI. Conclusions and Improvement Direction

****Core Conclusions:****

1. ****Insurance outcome is the sole criterion for testing business value.**** The three cases show that both claim payments and payout events significantly enhance customer loyalty and brand value for the company.
2. ****Consistency of the entire experience chain – Application → Underwriting → Service → Claim/Payout – determines the customer' s ultimate perception.**** In Case 1, rapid claim settlement drove referrals; in Case 2, empathetic investigation and communication preserved trust.
3. ****Benefits to the company**** are reflected not only in current period profit, but also in long - term mortality/morbidity gains, persistency ratio, and NPS improvement.

****Areas for Improvement (from Q2 2026):****

- Strengthen ****pre - application intelligent health disclosure pre - screening**** to reduce disputes over denial due to pre - existing conditions (currently 68% of denied claims are related to inadequate disclosure).
- For customers who have become disabled after a critical illness claim, launch a ****“Rehabilitation Care Manager” service****, providing rehabilitation plans through the company' s partner medical institutions to reduce the risk of secondary claims.
- Develop an ****“Insurance Outcome Calculator” **** that allows customers to simulate, at the time of application, the actual claim amount they would receive under different scenarios and the replacement ratio of their income, thereby promoting more rational purchasing decisions.

****Appendix:**** Disclaimer regarding masking of case customer contact details (all contact numbers are test virtual numbers and do not point to real individuals)

****End of Report****
